Health benefits

Its excellent activity may promote increased cerebral blood circulation and provide unparalleled memory-enhancement, improved focus and attention. Its most effective in increasing blood circulation to optimum levels, thereby improving short term memory & cognitive functioning.

Vinhance may also assists in management of age-related memory loss & is presently sold to users in over 25 countries the world over.

Benefits In Detail (link)

Vinpocetine is a cerebral metabolic activator and a neuronal protector. Clinical studies indicate that vinpocetine helps

1. Cerebral vasodilation
3. Produces an immediate increase in the cerebral oxygenation and this results finally in the activation of the cerebral metabolism, the increase of glucose
4. The improvement of certain neurotransmitterstilization
5. Another benefit that has been observed by using vinpocetine is its neuronal protection effects which increase resistance of the brain to hypoxia and ischemia
6. Reduce platelet aggregation, and improve red blood cells deformability allowing oxygen to feed neurons through microcapillaries
7. Evidence also shows that Vinpocetine has antioxidant properties

There are more than 100 clinical studies on Vinpocetine performed on over 30,000 patients

proving its safety and effectiveness. Vinpocetine has many different effects of varying importance on cognitive functions such as increase of attention, concentration, and memory

Almost anyone can benefit from taking vinpocetine. From people who have already cognitive deterioration, through baby boomers who are starting to suffer the symptoms of memory loss to young people and students who want to enhance their memory to increase their intellectual intelligence as well as to get good results at exams.

Products

Vinhance® Vinpocetine is sold only in bulk for further processing into dietary supplements. It is not intended to diagnose, treat, cure or prevent any disease.

Active Components

Vinpocetine
